

# PHP Developer

## Position Details:

We are expanding our development team and are looking for a passionate and creative **PHP Developer** to join our existing development team based in Southport, UK.

You will be required to make changes to our platform within our development environment as per the team's development pipeline. You will also be required to attend specification meetings and engage with integration partners to integrate our systems further.

If you have a passion for creating software that impresses users beyond their expectations, then join our dynamic agile development team who do just that!

You will be joining a team who are responsible for creating an incredible user experience using the latest development techniques. Our product has been developed from the ground up by our inhouse team and you have a chance to put your signature on it.

## Skills & Requirements:

**The ideal candidate will have experience in the following:**

- PHP 7.0+
- MySQL/MariaDB
- Strong Laravel Knowledge
- jQuery
- RESTful API Development
- HTML/CSS
- AWS
- Git
- CentOS
- Agile (XP) Development

## About You:

You are proud of the products and features you have implemented. You love solving problems, working in an agile (XP) environment, are a fast learner and have a fantastic attention to detail. You communicate and work well with your peers and people outside your team.

You code blindfolded in PHP/MySQL/jQuery. You love coding and make sensible and practical choices amongst multiple design solutions, in keeping with existing UI/UX.

## Your Team:

Smart, dynamic and inclusive. We learn from each other all the time. We make choices based on the merit and not position of the person who is suggesting it. We have a strong bond together which is based on the success of our product.

You will be working as part of a team of 5 other developers with supporting skillsets and reporting to our Head of Development Manager who is also a developer.
